

Are you totally confident you could quickly and completely recover all of your data from tape in a disaster situation?

How long does it take you to restore a deleted file?

No matter the size of the business it's data is priceless to its success. DSM's electronic vaulting service is one of the simplest and most cost effective ways to protect data and ensure business survival should the worst happen.

DSM-Vault is a fully automated and scalable backup service which transfers customer information to our secure data centre. Data is encrypted before being sent to the vault from where files and folders can be simply and rapidly restored as and when required. In the event of total loss of your systems new servers can be reliably and quickly rebuilt, to dissimilar hardware if necessary.

The Solution

DSM-Vault have partnered with Asigra to offer a simple but highly effective data backup and recovery solution. DSM-Vault is truly multi-platform and supports all operating systems, database and email formats providing protection for an entire network. It has the flexibility for the user to specify a suitable backup schedule and prioritise critical data.

Support is our thing. We go that extra mile to ensure our customers' satisfaction. We don't use call centres, your call will be answered by a real person in the UK. You will have a dedicated DSM Account Manager supported by our team of technicians and engineers to make sure our service delivers.
